

Help students understand how biology relates to their everyday lives with the help of our 16 Relevancy Modules within McGraw Hill Connect. Each module consists of an overview of scientific concepts, videos, and in-depth application of those concepts. Ensure students are retaining information with auto-graded assessment questions that correlate to each module.

Process of Science

Scientific Thinking: Everyday Applications

Chemistry, Cell, and Membranes

Formulation

The Biology of Generation

DNA, Cell Division, Inheritance, and Biotechnology

Cancer

Evolution and Diversity

Evolution of a

Artificially

Our Human's History of Diversity

Plant Biology

Plant Growth
