Best Practices for Pacing and Progress

ALEKS Training Series

Instructors

The ALEKS Pie

ALEKS Initial Knowledge Check results show:

What topics students already know

Students will not have to re-learn topics they already know in ALEKS. They start where they are ready to learn.

Here are 4 Strategies to Keep Students on Pace

Strategy 2: Use Objectives With Due Dates

Using Objective goals with due dates in ALEKS is recommended to keep students on task. These can be set for both math and chemistry objectives.

Strategy 2: Topics

When a student logs in to ALEKS they will see how many topics they are expected to complete and the due date.

Strategy 3: Weekly Topic Goal Assignments

A weekly topic goal assignment sets expectations on how many topics a week need to be completed to be successful in the course. Go to **Assignments**>>click Manage Assignments>>Click **+New Assignment**>>Pick **Topic Goal** and select your options.

A screenshot of a 'New Assignment' form in a learning management system. The form is titled 'One Time Assignment' and includes the following fields and options:

- Name:** Weekly Topic Goal
- Repeats:** Weekly (dropdown menu)
- Due on Day of the Week:** Monday (dropdown menu)
- Occurrences on:** 15 (text input)
- Ends After:** 15 (text input)
- Award Points:** Partial Credit by Percent (dropdown menu)

The form also features a 'Save' button and a 'Cancel' button. At the bottom, there are two tabs: 'Score' and 'Critical'.

Strategy 4: Help Students Meet Their Weekly Goals
