Students may be grouped for math so that every child is taught at his or her level of performance. The most important things you can do to help your child be successful this year are:

1) Send your child to school every day that they are able to attend!

Daily attendance is very important so that your child does not miss the introduction of important new math concepts and the review of earlier work.

2) Make sure your child completes all homework assignments!

Assigned homework is an important part of the learning process. It helps your child to practice what they have learned in class and to identify areas where they need more help. Homework should be done regularly and consistently.

Students learn specific skills and concepts. We look forward to a

Math Teacher
