

Parent Information Sheet: CMC Level F

Connecting Math Concepts is a core mathematics program that is aligned to the Common Core State Standards. Each lesson covers a variety of topics (for example, subtraction, word problems, geometry) and each topic is developed gradually over many days of instruction to help every child be successful and master the content of the lessons.

Here are some of the topics your child will learn about this year:

Fraction operations (including unlike denominators)

Word problems (including fractions and mixed numbers)

Area, perimeter, and volume

Long division

Exponents

Data tables, graphs, and line plots

Equivalent fractions, decimals, and percents

Unit conversion

Decimal operations (+/-/×/÷)

Coordinate system (points and lines)

Students may be grouped for math so that every child is taught at their level of performance and rate of progress. Every ten lessons, there is a test of the important concepts that have been recently taught. Your child's teacher will be able to monitor your child's progress on daily work and on test performance.

The most important things you can do to help your child be successful this year are:
